# PROJECT SHEET

## TRC Tully Falls Bridge Deck Replacement

### Project Overview

The Tully Falls Bridges project included the upgrade of two existing bridges on Tully Falls Road, Ravenshoe. The upgrades included the modification of existing bridge substructure, for the construction and installation of a new bridge deck surface. Ancillary works included bridge batter protection works, pavement approach works, and guardrail installations. SGPS provided Project Management and Inspectorial Services to fully manage the delivery of the project for Council. The project had significant design issues during construction, that SGPS managed to resolution to a successful delivery to the satisfaction of all parties.
