PROJECT SHEET

Mt. Louisa Water Main Duplication Project

Project Overview

The provision of Inspectorial services were engaged to assist with the installation of a DN500 DICL water main running from Graham Avenue to Dalrymple Road. The project was delivered within the client time restraints and budgets without any complaints arising from the public. Some of the works included the installation of DN500 DICL Water Main, and control valves. Hydrostatic testing, connection to existing mains, thrust block construction, poly welding and various restoration works.
